

PROG C7Z23: Programming Principles

Module Details	
Module Code:	PROG C7Z23
Full Title:	Programming Principles APPROVED
Valid From:	Semester 1 - 2019/20 (June 2019)
Language of Instruction:	English
Duration:	2 Semesters
Credits:	10
Module Owner::	Tony McCarron
Departments:	Unknown
Module Description:	Students completing this module will be capable of using a problem-solving approach to design, build and test solutions to fundamental programming problems.

Module Learning Outcome	
On successful completion of this module the learner will be able to:	
#	Module Learning Outcome Description
MLO1	Design, build and test programming solutions using appropriate fundamental programming constructs.
MLO2	Use simple data structures such as arrays and array lists to solve problems.
MLO3	Use abstraction and decomposition as techniques to create well structured solutions using both user-defined static methods and standard library methods.
MLO4	Read and write from files using library classes.
MLO5	Create programs with GUI interfaces.
Pre-requisite learning	
<p>Module Recommendations <i>This is prior learning (or a practical skill) that is strongly recommended before enrolment in this module. You may enrol in this module if you have not acquired the recommended learning but you will have considerable difficulty in passing (i.e. achieving the learning outcomes of) the module. While the prior learning is expressed as named DkIT module(s) it also allows for learning (in another module or modules) which is equivalent to the learning specified in the named module(s).</i></p>	
No recommendations listed	

Module Indicative Content
Programming Constructs Variables, types, expressions and assignment, Console based input-output, validation.
Control Structures Conditional and iterative control structures
Api Familiarity with the methods of library classes e.g. String, Math, Random etc.
Methods Method definition, invocation, variable scope, parameter passing, return types, and method overloading
Simple Data Structures Arrays and ArrayLists.
Input-output Files : reading and writing, GUI based programming.

Module Assessment

Assessment Breakdown	%
Course Work	100.00%

Module Special Regulation

Assessments

Full Time

Course Work			
Assessment Type	Continuous Assessment	% of Total Mark	20
Marks Out Of	100	Pass Mark	40
Timing	Every Second Week	Learning Outcome	1,2
Duration in minutes	0		
Assessment Description Formative assessment consisting of practical exercises designed to build upon the theoretical topics covered and to give practice in building programming solutions relevant to the current topic. Assessments will be both individual and pair based.			
Assessment Type	Class Test	% of Total Mark	20
Marks Out Of	100	Pass Mark	40
Timing	Sem 1 End	Learning Outcome	1,2
Duration in minutes	120		
Assessment Description A lab-based practical exam, summative in nature giving the student the opportunity demonstrate their problem solving ability and their knowledge of topics covered to this point.			
Assessment Type	Continuous Assessment	% of Total Mark	20
Marks Out Of	100	Pass Mark	40
Timing	Every Second Week	Learning Outcome	1,2,3,4,5
Duration in minutes	0		
Assessment Description Formative assessment consisting of practical exercises designed to build upon the theoretical topics covered and to give practice in building programming solutions relevant to the current topic. Assessments will be both individual and pair based.			
Assessment Type	Class Test	% of Total Mark	40
Marks Out Of	100	Pass Mark	40
Timing	Sem 2 End	Learning Outcome	1,2,3
Duration in minutes	120		
Assessment Description A lab-based practical exam, summative in nature giving the student the opportunity demonstrate their problem solving ability and their knowledge of topics covered in this module.			

No Project
No Practical
No Final Examination

Part Time

Course Work			
Assessment Type	Continuous Assessment	% of Total Mark	20
Marks Out Of	100	Pass Mark	40
Timing	Every Second Week	Learning Outcome	1,2
Duration in minutes	0		
Assessment Description Formative assessment consisting of practical exercises designed to build upon the theoretical topics covered and to give practice in building programming solutions relevant to the current topic. Assessments will be both individual and pair based.			
Assessment Type	Class Test	% of Total Mark	20

No Project			
No Practical			
No Final Examination			
Reassessment Requirement			
A repeat examination <i>Reassessment of this module will consist of a repeat examination. It is possible that there will also be a requirement to be reassessed in a coursework element.</i>			

Module Workload

Workload: Full Time					
<i>Workload Type</i>	<i>Contact Type</i>	<i>Workload Description</i>	<i>Frequency</i>	<i>Average Weekly Learner Workload</i>	<i>Hours</i>
Practical	Contact	Three 2-hour lab-based classes with the delivery of new content integrated with practical implementation.	Every Week	6.00	6
Independent Study	Non Contact	Independent work both lecturer- and and self-directed.	Every Week	1.00	1
Directed Reading	Non Contact	Investigation and directed learning from both books and online resources.	Every Week	1.00	1
Total Weekly Learner Workload					8.00
Total Weekly Contact Hours					6.00

Workload: Part Time					
<i>Workload Type</i>	<i>Contact Type</i>	<i>Workload Description</i>	<i>Frequency</i>	<i>Average Weekly Learner Workload</i>	<i>Hours</i>
Practical	Contact	One 3-hour lab based class with the delivery of new content integrated with practical implementation.	Every Week	3.00	3
Independent Study	Non Contact	Independent work both lecturer- and and self-directed.	Every Week	3.00	3
Directed Reading	Non Contact	Investigation and directed learning from both books and online resources.	Every Week	2.00	2
Total Weekly Learner Workload					8.00
Total Weekly Contact Hours					3.00
