

CSYS C7Z19: Computer Hardware

Module Details	
Module Code:	CSYS C7Z19
Full Title:	Computer Hardware APPROVED
Valid From:	Semester 1 - 2021/22 (September 2021)
Language of Instruction:	English
Duration:	1 Semester
Credits:	5
Module Owner::	Andrew Wright
Departments:	Unknown
Module Description:	Students completing this module will be able to explain how modern digital devices work and describe how their components interact with each other.

Module Learning Outcome	
On successful completion of this module the learner will be able to:	
#	Module Learning Outcome Description
MLO1	describe the basic architecture of digital devices.
MLO2	explain how the CPU, memory, and data storage devices function and interact with each other.
MLO3	describe how input/output devices communicate with digital devices.
MLO4	write simple assembler programs.
Pre-requisite learning	
<p>Module Recommendations <i>This is prior learning (or a practical skill) that is strongly recommended before enrolment in this module. You may enrol in this module if you have not acquired the recommended learning but you will have considerable difficulty in passing (i.e. achieving the learning outcomes of) the module. While the prior learning is expressed as named DkIT module(s) it also allows for learning (in another module or modules) which is equivalent to the learning specified in the named module(s).</i></p>	
No recommendations listed	

Module Indicative Content
Introduction History of computing, terminology, software/hardware layering.
Introduction to digital electronics Logic gates, truth tables, simple circuit design, example circuits (adders, flip-flops etc.)
CPU Types, fetch-execute cycle, adders, assembler code, registers.
Memories Types (SRAM, DRAM, ROM & Flash), main, cache, addressing, two's complement numbers, endian.
Storage History, hard drives, solid state drives, removable storage.
Data transfer System bus, interfaces, interrupts.
Input/Output devices Keyboard, mouse, touch screens, scanners, monitors, speakers, printers.
